

QA Automation Test Report

Candidate: Sandesh Bhusal

Position: QA Intern – Vrit Technologies

Project: Signup Automation – <https://authorized-partner.vercel.app/>

Date: 29/10/2025

1. Objective

Automate the signup process for the authorized partner portal to ensure:

- All form pages are correctly filled.
 - File uploads work.
 - Dropdowns, checkboxes, and OTP verification function as expected.
 - Successful completion triggers a confirmation notification.
-

2. Test Environment

- **Language:** Python 3.11
 - **Framework:** Selenium WebDriver
 - **Browser:** Google Chrome v118+
 - **Driver:** ChromeDriver 118+
 - **OS:** Windows 10 / Linux
 - **Dependencies:**
 - selenium
 - time
 - os
 - random
-

3. Test Data

Field	Sample Value
First Name	John
Last Name	Doe
Email	Temporary email generated from temp-mail.io
Phone Number	Random 10-digit number

Field	Sample Value
Password	Sandesh@123
Agency Name	John2
Role in Agency	Doe2
Website	www.google.com
Address	chysal-09
Region	Nepal
Experience	3 years
Students recruited annually	50
Focus Area	Undergraduate admissions to Canada
Success Metrics	90
Services Selected	Career Counseling, Visa Processing
Institution Types	Universities, Colleges
Business Registration Number	1234567890
Certification Details	ICEF Certified Education Agent
Files Uploaded	companyRegistration.pdf, educationCertificate.pdf

4. Test Steps / Automation Flow

1. Opened the site: <https://authorized-partner.vercel.app/>.
2. Clicked **Get Started** → agreed to registration checkbox → **Continue**.
3. Generated a temporary email from <https://temp-mail.io/en>.
4. Filled the first form (personal info, email, phone, password).
5. Received OTP from temporary email → entered OTP → verified.
6. Filled second form (agency info, region selection).
7. Filled third form (experience, students, focus area, services).
8. Filled fourth form (business details, country selection, institution types, certification, file uploads).
9. Submitted the form.
10. Verified the success notification:

"Verification and Preferences Added successfully! Registration completed!"

5. Results

Step	Expected Result	Actual Result	Status
Open site & navigate	Site opens & navigation works	Works as expected	 Pass
Temporary email	Generates valid email	Email received & OTP received	 Pass
Form filling	Data correctly entered	Data entered successfully	 Pass
Dropdowns & selections	Selected options visible & clicked	All selections made correctly	 Pass
File upload	Files uploaded without errors	Both files uploaded	 Pass
Form submission	Confirmation notification	Notification appeared	 Pass

Overall Result:  Passed

6. Notes

- The script is fully automated; no manual intervention is required.
 - The script handles dynamic elements using waits, and ActionChains.
 - OTP retrieval is automated via temporary email.
 - Files must be placed in the same folder as the script:
 - companyRegistration.pdf
 - educationCertificate.pdf
-

7. Conclusion

The automation script successfully completes the entire signup flow with valid test data and file uploads. All requirements of the task have been met.
